DETAILED ACTION

1. Claims 46-68 and 93-117 are pending. Claims 46, 64-66, 93, and 113-115 have been amended in this communication filed 12/17/07 entered as Response After Non-Final Action.
2. The claim objections to claims 93 and 114 have been overcome by Applicants' amendments to claims 93 and 114 and are hereby withdrawn.
3. The 35 USC 112, second paragraph rejections for claims 46, 65, 66, 93, 114, and 115 have been overcome by Applicants' amendment to claims 46, 65, 66, 93, 114, and 115 and are hereby withdrawn.

Examiner's Amendment

An Examiner's amendment to the record appears here below.

The authorization for this Examiner's amendment was given in a telephone call by Attorney Rhett White on July 11, 2008 cancelling claims 69-92 and claims 118-190.

Allowable Subject Matter

Claims 46-68 and 93-117 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art (US 7,177,836) German et al. German et al discloses, a transaction that includes payment from one consumer to another consumer with an intermediary operating the service over a Network (Internet). This reference is by two of the same inventors and filed on the same date as the instant application. The next closest prior art is (US

6,260,024) Shkedy. Shkedy discloses buyers and sellers in a payment system involving the use of an escrow account associated with the buyer where funds advanced by the buyer to cover the purchase of the desired good(s) can be kept pending delivery of the good(s) by the selected seller and Shkedy also has an intermediary account, a buyer account, a seller account, an escrow account, and a purchase confirmation tracking number but fails to disclose Applicants' claims 46 and 93 with querying the shipping service tracking database to determine whether the goods have been delivered to the buyer, indicating based at least in part on information from the shipping service database that the goods have been delivered to the buyer and determining if the goods have been acceptably delivered to the buyer as of an indicated delivery date, and determining in response that the goods have been acceptably delivered to the buyer as of the indicated delivery date, effecting completion of the transaction by communicating an instruction to the payment instrument processor to make payment to the seller.

Almar Latour, NPL reference, "PayPal Electronic Plan May Be On The Money in Years to Come" cited by Applicants' discloses making payments over the Internet and online payment being more secure than checks and other paper-based methods, but fails to disclose Applicants' claims 46 and 93 with querying the shipping service tracking database to determine whether the goods have been delivered to the buyer, indicating based at least in part on information from the shipping service database that the goods have been delivered to the buyer and determining if the goods have been acceptably delivered to the buyer as of an indicated delivery date, and determining in response that the goods have been acceptably delivered to the buyer as of the indicated delivery date,

effecting completion of the transaction by communicating an instruction to the payment instrument processor to make payment to the seller. Hal Plotkin, NPL reference, "Beam Me Up Some Cash" cited by Applicants' discloses using a PDA to execute a command to have money drawn from an account previously designated and placed in the PayPal account in the partner's PDA and if the recipient does not have an account, the software it accept the payments can be quickly transmitted in the same fashion, but fails to disclose Applicants' claims 46 and 93 with querying the shipping service tracking database to determine whether the goods have been delivered to the buyer, indicating based at least in part on information from the shipping service database that the goods have been delivered to the buyer and determining if the goods have been acceptably delivered to the buyer as of an indicated delivery date, and determining in response that the goods have been acceptably delivered to the buyer as of the indicated delivery date, effecting completion of the transaction by communicating an instruction to the payment instrument processor to make payment to the seller. Golvin et al (EPO 949596) reference cited by Applicants' discloses performing electronic value exchange and settlement among heterogeneous payment schemes with heterogeneous currencies but fails to disclose Applicants' claims 46 and 93 with querying the shipping service tracking database to determine whether the goods have been delivered to the buyer, indicating based at least in part on information from the shipping service database that the goods have been delivered to the buyer and determining if the goods have been acceptably delivered to the buyer as of an indicated delivery date, and determining in response that the goods have been acceptably delivered to the buyer as of the indicated delivery date,

effecting completion of the transaction by communicating an instruction to the payment instrument processor to make payment to the seller. Greenspan et al (EPO 745961) reference cited by Applicants' discloses a credit card over a network being used to purchase goods or services of a particular value, but fails to disclose Applicants' claims 46 and 93 with querying the shipping service tracking database to determine whether the goods have been delivered to the buyer, indicating based at least in part on information from the shipping service database that the goods have been delivered to the buyer and determining if the goods have been acceptably delivered to the buyer as of an indicated delivery date, and determining in response that the goods have been acceptably delivered to the buyer as of the indicated delivery date, effecting completion of the transaction by communicating an instruction to the payment instrument processor to make payment to the seller.

For these reasons claims 46 and 93 are deemed to be allowable over the prior art of record, and claims 47-68 and 94-117 are allowed by dependency.

It appears that the instant invention is beyond the skill of one of ordinary skill in the art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been able to predict the results, and as such, they would have had no capability of expecting success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
